

OUR VISION

Our company is a world leader, renowned for its application of leading technologies in the design & manufacture of superior stainless steel heat transfer products for the dairy, brewing & water heating industries.

Our reputation has been built through having a positive impact on people's lives by using our core strengths of, engineering, manufacturing & thermal transfer know-how to offer pioneering innovative solutions that sustain the environment and a first class after sales service.

In recent years we have an impressive record of exceptional growth and profits, extending our U.K. market leadership and continuing our expansion into global markets. This has been achieved through continual investment in research and development & manufacturing technology.

We have developed a deep understanding and long-term relationship with both existing and new strategic partners and are committed to consistently exceeding customers' expectations.

Creating a culture in which there is a deep sense of pride and ownership in achieving both company goals and personal aspirations has reinforced our achievements. Our culture has a strong commitment to outstanding teamwork, continuous personal development, result based reward opportunities and reinvestment in new technology & processes.
